

CFS2160- Week 2 Questions

Task

Before you start this work sheet, create a folder on your K:\ drive into which you should save your work. Call it something like 'CFS2160 SSD', in that folder create a folder for each week as you go along and save your work (with a suitable filename). This is a very good habit to get into!

Now, to the questions.

For each of the following, write down what will be outputted to the console?

Q1.

Inspect the following code

```
var_1 = True
print(var_1)
```

Q2.

```
var_2 = False
print(type(var_2))
```

Q3.

```
var_3 = "Hello. World"
print(var_3)
```

Q4.

```
var_4 = 67865
print(var_4)
```

Q5.

```
var_5 = 3.14159
print(var_5)
print(type(var_5))
```
